

Table Management

Table Map

- Define your dining area on one screen or assign different rooms or dining areas to separate tabs.
- Table sizes, shapes and seating capacities are controlled in the table map designer.
- Use the table map for tasks in Table and Guest Management and Point of Success order entry.
- Assign servers to different stations.

Wait List and Reservation

- Enter guest name, party size, and seating preference.
- Record estimated wait time.
- Track waiting guest statistics (total guests waiting, longest wait time, average wait time).
- Track reservations for any date in the future.
- Set your reservation list time interval and the total number of reservations permitted for any point in time.

Name	Time
Suzie Q	Actual: 2 Estimated: 0
Maria	Actual: 0 Estimated: 0

Time	1	2	3	4	5
3 PM					
4 PM					
5 PM					
6 PM	Jason (4)				
7 PM					
8 PM					
9 PM					
10 PM					
11 PM					

Parties Waiting: 1

Add to Wait List Tables Legend Statistics

Management Information

The Manager's Console gives a one-screen overview of guest seating, wait list and reservation performance permitted for any point in time.

Automatically Make a Table Available

Tables in the Table Map can be automatically made available when all the orders on a table are paid.
